You're a saint for putting this together.

I added tracked comments just before driving up to Boulder to meet my son for a show, so I was a little distracted.  Please make sure these comments reflect your intent before accepting any of them.

I think you did a great job hitting all of the major points.

Hi folks- I talked to Darcy and she already gave Doug the briefing paper and Gantt chart style timeline (she prefers that format, so I can keep that up if you can help give me the info). So no new materials needed. Please come prepared to discuss:
1) what has taken so much time since received comments.
2) why need so much time to get drafts back out
3) site specific reasons why we need this level of model

I know this is complicated, so I'll try to chime in as needed to support what you're saying.

Please let me know if you have questions. Thanks!
